

OVERVIEW

PREMIUM FEATURES – CREATE AND ANALYSE BUNDLE

- **New – Create Personal Materia Medica**
 - New editing tools allow you to create your own Materia Medica derived from personal clinical experience, seminar notes, compilation of existing material in RadarOpus or from various books and online sources.
 - Create Materia Medica for any existing remedy from the 8448 in our database!
 - Add chapters within each Remedy Portrait, e.g. MIND, GENERALS, PARTICULARS.
 - Add images and adjust formatting with bold, italics and underlines.
 - The program reindexes as soon as you finish editing, so that the text is discoverable via the search tool straight away!

- **New – Create Personal Repertory**
 - In addition to the Synthesis Adonis Personal Chapter, you can now create your own repertory from scratch!
 - Easily add new symptoms, cross references, synonyms, remedies, families, notes and weblinks. *In any language!*
 - Perfect for creating your own clinical repertory - e.g. with an alphabetical structure.

- **New - Create Custom Symptom Templates (Patient File)**
 - Create your own Symptom Template to work in conjunction with the Patient File.
 - Add your most frequently used rubrics from any repertories to the template.
 - Analyse your case with these symptoms automatically without having to open the repertory and search for the symptom – a great time saver!
 - Create your own checklists for the patient – e.g. Polar modalities from Boenninghausen's Pocketbook, Mental Qualities from Q Rep, Organ affinities from Stoteler, Ailments from in Adonis. The possibilities are limited only by your imagination.
 - *Expert tip* – if you already made some Bookmarks on your frequently-used repertory symptoms, then you could add these to your Symptom template!

- **New - Analyse with the Master Score (new Analysis strategy)**
 - Dr. Farokh Master has created an Analysis strategy which weights your analysis based on an approval rating of each author.
 - Reliable sources are given higher approval and accorded a stronger weighting in the Analysis compared to a less-confirmed source.
 - *This allows you to analyse your case in a very similar way to Dr. Master!*

- **New - Analyse by comparing 3 remedies side-by-side in a graph**
 - This tool allows you to extract up to 3 remedies for side-by-side comparison.
 - Extract a graph displaying the total number of symptoms of each remedy from the different chapters of any repertory.

- This allows for a detailed study and comparison of the *sphere of action* of each of the 3 remedies that you may be considering as a prescription.
- **New - Analyse with multiple strategies in one interface**
 - The Analysis screen can now show all the different strategies in one window!
 - This saves time, as you don't have to flick back and forth between e.g. 'Sum of Symptoms (sorted by degrees)' to 'Small remedies' or 'Prominence'. With this new module, you can view them all at a glance.

FREE NEW FEATURES

- **New - Choose your Favorite Repertories and Materia Medica**
 - R-click any Repertory or Materia Medica and choose 'Add favorite' – the item is starred and the option to move it to the top of the Table of contents (TOC) is given.
- **New - Add linked symptoms from Concepts repertories straight to the clipboard**
 - In Concepts repertories, there are links to symptoms in Synthesis Adonis.
 - You can take any number of those linked symptoms to a clipboard with a few mouse clicks.
 - *Expert tip* - Very useful when looking up pathologies and the list of common symptoms (to know which ones are less useful in individualizing the case).
- **New - Optional password protection**
 - Password protection remains a prerequisite for medical and professional Homeopaths saving patient information due to GDPR and HIPAA regulations.
 - For part-time Homeopaths, or those not storing patients in the program, there is now an option to remove the password protection from RadarOpus.
- **New - Graphical revision with new icons and layout options, accessed via main options menu**
 - Additional customization options have been added, including a choice of 3 different sets of icons (default, classic, office), and an alternative skin to freshen up the look of the program.
 - Your chosen font and font size is now used throughout the program making it easier to read menus, tab titles and search queries.
 - You can now add/ remove icon titles in the Main Toolbar.
 - *Expert tip* - You can enlarge the search field in the Main Toolbar for easier access to quick searching.
- **New – List of Authors and documents**
 - Click VIEW – List of authors and documents – to see a full bibliographical listing of the references used in the program
